

The DTC1250e offers the following built-in and optional features:

- A dual-sided printing module that enables you to add additional company or cardholder information as needed.
- A Wi-Fi accessory for Ethernetenabled printers, allowing you to print anywhere, anytime.
- Choose from either the easy-to-use allin-one ribbon cassette (EZ ribbons) or the more economical and eco-friendly refill ribbon (ECO ribbons) option.
- An optional iCLASS SE* encoder that enables your printer to be compatible with the HID secure identity ecosystem. This includes the ability to program the HID PACS data in the printer. The encoder provides an additional layer of security to your identity program by allowing for processing of Secure Identity Object (SIO) data, and enabling the printer to become a Trusted Identity Platform (TIP) endpoint.
- Optional internal server for secure printing over a network, enabling distributed card issuance in seconds.
- Optional technology card encoders that allow you to easily migrate to contact and contactless smart card technologies (including but not limited to iCLASS SE® or MIFARE®) or simple mag stripe and prox cards as needed.
- Eco-friendly erase and rewrite feature, ideal for creating temporary ID cards, such as visitor badges.
- Ability to print on a variety of card thicknesses to create simple loyalty cards as thin as 9mm, or access control badges as thick as 40 mm.

DIRECT-TO-CARD PRINTER

- Fastest printer in its class Minimize wait time for cards and IDs with this speedy card printer.
- High-quality output Simple, reliable and affordable photo ID card personalization, delivering a new level of durable, great-looking credentials.
- Simple plug-and-play The intuitive user-focused design allows for easy set-up, loading and operation for increased efficiency.
- Convenient and affordable Create ID cards right out of the box with plug-and-play
 Swift ID™ embedded badging application.
- End-to-End Control, Flexibility and Security The optional iCLASS SE® encoder (part of the iCLASS SE open encoder platform) can be fully integrated into your printer, allowing you to create, encode (read/write) and manage your secure credentials from start-to-finish. Design personalized ID badges locally and then program them to work with your current physical access control system (PACS), streamlining your ordering, inventory management, and issuance processes.
- Additional Data Protection Secure data sent to printer with AES-256 decryption.

Designed for small-to-medium businesses, the DTC1250e provides maximum efficiency in a sleek, user-friendly design. This printer is virtually maintenancefree and prints full-color, plastic ID and technology cards on a budget.

The DTC1250e adds a level of convenience to easily print what you need, including:

- Choose from easy (EZ), all-in-one print ribbon and card cleaner or economical and eco-friendly (ECO) refill ribbons.
- Built-in Swift ID™ badging application enables you to create ID badges in seconds without having to install any additional software.

- Edge-to-edge printing in full-color or simple black and white.
- Intuitive design provides instant system status through color-changing buttons.
- Industry's first, inline card printing and technology card encoding with a single connection using USB or optional Ethernet or Wi-Fi connectivity.

The FARGO® DTC1250e is built with Genuine HID® technology and is fully interoperable with other products in the HID ecosystem, enabling organizations to leverage their existing technology investments.

Encoding Options 125 k card	ported smart card and magnetic stripe encoding options: kHz (HID Prox) reader; 13.56 MHz (iCLASS*, MIFARE*, ISO 14443 A/B, ISO 15693) read/write encoder; contact smart encoder reads from and writes to all ISO7816 1/2/3/4 memory and microprocessor smart cards (T=0, T=1) as well as hronous cards; ISO magnetic stripe encoding, dual high- and low-coercivity, Tracks 1, 2 and 3
Supported Access Control Credential Programming	SS® Standard/SE/SR, MIFARE Classic™, MIFARE Plus®, MIFARE DESFire®, MIFARE DESFire® EV1, HID Prox
Options availa	le wire Ethernet and USB 2.0 interface for inline printing and encoding (note: single wire Ethernet encoding is only able for iCLASS*, MIFARE*, and contact smart card encoding) - Ethernet-enabled printer supports wireless accessory; -sided printing module; smart card encoding modules (contact/contactless); magnetic stripe encoding module; printer ning kit; ethernet with internal print server; secure proprietary consumables system
Software Swift	t ID™ embedded badging application, FARGO Workbench™ diagnostic utility with Color Assist™ spot-color matching
	r changing status buttons

* Indicates the ribbon type and the number of ribbon panels printed where Y=yellow, M=magenta, C=cyan, K=resin black, O=overlay, B=dye sublimation black.

** Print speed indicates an approximate print speed and is measured from the time a card drops into the output hopper to the time the next card drops into the output hopper. Print speeds do not include encoding time or the time needed for the PC to process the image. Process time is dependent on the size of the file, the CPU, amount of RAM and the amount of available resources at the time of the print.

***Linux versions: Ubuntu 12.04, Debian 7.0, Fedora 18, Mandriva 2011, Red Hat 6.4, Open Suse 12.3
