PROCONTROL®

ProxerSafe Drawer with XS-size drawers, online version

Value storage cabinet with small sized drawers or boxes and RFID reader

Version 1.0
October 19, 2016

The ProxerSafe system has been created to keep keys, devices, instruments or documents safe, and manage them in a supervised, authorized and online traceable way.

If tools, documents, mobile devices, valuables are to be kept safe, then the storage boxes with separate doors mean a good solution. There are storage boxes with larger box size for keeping larger objects, and smaller ones e.g. for bunch of keys or ID cards.

ProxerSafe cabinets meet the international standards of 19" rack modules, and can be built into 19" rack towers and certified safes. Other formats are available per request.

This product contains XS sized (W84 x H50 x D100 mm) storage boxes, but safety cabinets can be ordered with different box number and with distinct box/door sizes; what's more, drawer and box sizes can alter in one cabinet and be combined with key-holder plugs.

This version has no built-in PC, thus cabinet can be managed from ProxerNet software KeySafe module running on a remote computer.

Structure and operation:

- ProxerSafe Drawer is built-in a designed, clear-out housing, following the Rack standard or in other format according to demand. Can be wall-mounted or in standing form or fitted in classified safe.

- After identification and checking the authorization the closed drawer pops out.

- Contains XS-size drawers: W84 x H50 x D100 mm (where W stands for width, H stands for height and D for depth)
