

ParkGate 8

Exit read terminal

The ParkGate 8 barrier-controlling kiosk opens the barrier at the exit of the parking area in front of the leaving car if the ticket paid is shown.

The ParkGate 8 exit read terminals are fitted with a long-distance omnidirectional laser reader, a 2 x 16 characters LCD display, background lighting, an audio signal, a keyboard, a proximity card reader, in an impact resistant sealed outdoor case, including an Ethernet interface, to open the exit barrier.
